

TABLE OF CONTENTS

PREFACE	iii
---------------	-----

KEYNOTE ADDRESSES

Chapter

1. Presidential address J.R. Watson	1
2. Climate, soils, and turfgrass adaptation In the Southern USA G.H. Snyder, G.W. Burton, and T.P. Riordan	5
3. Developments in warm-season turfgrass breeding/genetics C.M. Taliaferro and P. McMaugh	14
4. Turfgrasses in Europe: Cultivar evaluation and advances in breeding A.J.P. van Wijk	26
5. Amenity grass and culture F. LeMaire.....	39
6. Advances in plant nutrition N.E. Christians	50
7. Current status of warm-season turfgrass weed control and future directions B.J. Johnson and T.R. Murphy	58
8. Integrated insect management In turfgrasses: Prospects and problems D. A. Potter	69
9. Integrated control of turfgrass diseases: Research and reality L.L. Burpee.....	80
10. The xeriscaping concept: What about turfgrasses J.B. Beard	87
11. Turfgrass water conservation and quality M.P. Kenna and G.L. Horst.....	99

SYMPOSIA: PESTICIDE AND NUTRIENT FATE IN TURFGRASS SYSTEMS

12. The loss of di nitroaniline herbicides from turfgrass surfaces due to photodecomposition and volatilization A.T. Perkins	114
13. Volatilization as an avenue for pesticide dissipation R.J. Cooper	116
14. Exposure to pesticides following application to turfgrass sites K.A. Hurto and R.A. Yeary	127

15. Pesticides and nutrients in turfgrass runoff S.A. Harrison.....	134
16. Leaching: Current status of research A.M. Petrovic.....	139
17. Accelerated degradation of turfgrass pesticides: A review H.D. Niemczyk	148
18. Pesticide regulation In Japan Y. Maki	152
19. Ground water and surface water risk assessments for proposed golf courses S.Z. Cohen, T.E. Durborow, and N.L. Barnes.....	162

**SYMPOSIA: QUANTIFICATION OF SURFACE
CHARACTERISTICS OF SPORTS FIELDS**

20. Concepts of playing quality: criteria and measurement S.W. Baker and P.M. Canaway	172
21. Alteration of sports field characteristics using management S.T. Cockerham, V.A. Gibeault, R.K Khan	182
22. Soil and turf properties governing playing quality P.M. Canaway and S.W. Baker	192
23. A multivariate risk analysis of natural grass and astroturf playing surface in the national football league 1980-1989 J.W. Powell and M. Schootman	201
24. Playing quality, performance, and cost-effectiveness of soccer pitches in the UK R.J. Gibbs, W.A. Adams, and S.W. Baker	212
25. A national approach to the performance testing of cricket grounds and lawn bowling greens K.W. McAuliffe and R.J. Gibbs	222
26. Present status of quantification of sports turf surface characteristics In North America J.N. Rogers, III and D.V. Waddington.....	231

SECTION 1. WEED SCIENCE

27. Granular herbicides for postemergent broadleaf weed control in cool-season turfgrass without 2,4-D J.C. Neal.....	238
28. Perennial ryegrass (<i>Lolium perenne</i>) establishment following diclofop application timings and rates L.B. McCarty and T.R. Murphy.....	246
29. Rooting of turfgrass sods following preemergence herbicide application W.M. Lewis, J.M. DiPaola, and A.H. Bruneau	250
30. Chemical control of algal crusts P.F. Colbaugh and E.A. Williams	257
31. Tolerance of Mon 12000 herbicide to warm and cool-season turfgrasses J.N. Travers, N.E. Jackson, K. D. Jolly, D.R. Williamson.....	262

32. Control of purple and yellow nutsedge in turfgrass with MON 12000 N.E. Jackson, T.E. Dutt, J.N. Travers, and J.M. Goette	269
33. Efficacy of fall and spring-applied preemergence herbicides for annual grass control In Kentucky bluegrass Z.J. Reicher and C.S. Throssel	273
34. Response of Kentucky bluegrass to three consecutive annual applications of dithiopyr P.C. Bhowmik and B.M. O'Toole.....	227
35. The use of corn gluten meal as a natural preemergence weed control In turf N.E. Christians.....	284
36. November applied preemergence herbicides for smooth crabgrass control the following summer P.H. Demoeden	291
37. Preemergence herbicide use during buffalograss establishment M.A. Harivandi, C.L. Elmore, and L. Wu	298
38. Common bermudagrass control in tall fescue with fenoxaprop B.J. Johnson and R.N. Carrow	303
39. Southern crabgrass and goosegrass control in bermudagrass with dithiopyr T.R. Murphy, L.B. McCarty, and B.J. Johnson	310

SECTION 2. DISEASES, INSECTS AND NEMATODES

40. Influence of nitrogen source and soil pH on summer patch development in Kentucky bluegrass D.C. Thompson, B.B. Clarke, J.R. Heckman, and J.A. Murphy.....	317
41. Effects of temperature, leaf wetness duration and inoculum concentration on infection of annual bluegrass by <i>Colletotrichum graminicola</i> J.M. Verges, T.K. Danneberger, and A.L. Jones.....	324
42. Bermudagrass decline: Transmission of the causal agent <i>Gaeumannomyces</i> <i>graminis</i> var. <i>graminis</i> by vegetative planting material M.L. Elliott	329
43. Variation In cultural characteristics and pathogenicity within a local population of <i>Magnaporthe poae</i> P.J. Landschoot, B.F. Hoyland, and B.B. Clarke.....	335
44. Evaluation of turfgrass disease diagnostic test kits in Europe N.A. Baldwin	342
45. Zoysiagrass resistance to the zoysiagrass mite, <i>Eriophyes zoysiae</i> (Acari:Eriophyidae) J.A. Reinert, M.C. Engelke, and S.J. Morton	349
46. Population outbreak of the southern chinch bug is regulated by fertilization P. Busey and G.H. Snyder	353
47. Chemical control of southern chinch bug In St. Augustinegrass R.L. Crocker	358

48. Enhanced efficacy of isazophos against Japanese beetle larvae using sub-surface placement technology P.J. Vittum	364
49. Growth, survival, and damage relationships of white grubs in bermudagrass vs. tall fescue S.K. Braman and A.F. Pendley.....	370
50. Alternatives for European crane fly control in turfgrass G.K. Stahnke, S.E. Brauen, A.L. Antonelli, and R.L. Goss	375
51. Patterns of flight activity of pest mole crickets in Georgia S.K. Braman and W.G. Hudson	382
52. Effect of subsurface application of entomopathogenic nematodes on non-target arthropods in turfgrass D.J. Shetlar, K.T. Peer, and H.D. Niemczyk	385
53. Effects of fenamiphos or fenamiphos sulfone on the survival of the sting nematode, <i>Belonolaimus longicaudatus</i> , in vitro R.M. Giblin-Davis, J.L. Cisar, G.H. Snyder, and C.L. Elliott	390
54. Entomopathogenic nematodes as bio-pesticides for control of turfgrass insects C.T. Redmond and R. Georgis	398

SECTION 3. SOIL PHYSICAL PROPERTIES AND TURFGRASS RESPONSE

55. A national survey of winter games pitches in the UK with high-quality drainage design W.A. Adams, R.J. Gibbs, S.W. Baker, and C.D. Lance	405
56. Changes in soil physical properties of different construction methods for soccer pitches under intensive use R.J. Gibbs, W.A. Adams, and S.W. Baker	413
57. The NZTCI permeameter method for identifying soil drainage problems D.R. Howard and K.W. McAuliffe.....	422
58. Long-term improvement in drainage and aeration within impermeable golf greens G. Jaaback	426
59. The effect of slit tine and hollow tine aeration on the performance of soccer pitches of five construction types S.W. Baker and C.W. Richards.....	430
60. Soil cultivation effects on establishment of <i>Poa pratensis</i> L. sod D.K. Lee and P.E. Rieke	437
61. A study of three physical conditioning treatments on a fine sandy loam golf green K.W. McAuliffe, P.E. Rieke, and D.J. Home.....	444
62. Turfgrass cultivation methods: Influence on soil physical, root/shoot, and water relationships G. Wiecko, R. N. Carrow, K.J. Karnok	451
63. Influence of fertilizer source and core cultivation on the growth of Kentucky bluegrass M.L. Agnew and N.E. Christians	458

64. Age development in sand-based turf J.W. Murphy, T.R.O. Field and M.J. Hickey	464
65. Effects of using seed, sod and juvenile sod for the establishment of an aji-sand golf green turf and on its initial performance under wear P.M. Canaway.....	469
66. Localised dry spot of UK golf greens, field characteristics, and evaluation of wetting agents for alleviation of localised dry spot symptoms C.A. York and N.A. Baldwin.....	476
67. A simple method for determining the initial and residual effectiveness of soil wetting agents S. Mane, D. Moors, and R.A. Moors	485
68. Soil physical properties of soccer pitches: Relationships between laboratory and field measurements S.W. Baker and C.W. Richards.....	489
69. The effect of compaction energy and initial moisture content on laboratory determinations of soil physical properties of rootzone mixes for soccer pitches S.W. Baker and C.W. Richards.....	497
70. Correlating mechanical impedance to soil physical properties on a bermudagrass <i>Cynodon</i> sp. L.) turf P.F. Daniel, C.H. Peacock, and D.K. Cassel	504
71. Penetrometric assessment of the playability of coarse turf T.R.O. Field, J.W. Murphy, and P.J. Lovejoy	512
72. Turf for horseracing: Conflicting requirements of the turf grass plant and the racing horse H. Catrice	517

SECTION 4. SOIL/PLANT NUTRITION, SOIL CHEMISTRY

73. Effects of eight different mixing percentages of four soil modifiers on growth of bentgrass J. Zhongchun and O. Takeshi.....	522
74. Effects of four potassium sources at two N:K-ratios on putting greens S. Dahisson	528
75. Nitrogen release from coated ureas applied to turf J.D. Fry, D.O. Fuller, and F.P. Maler	533
76. Chemical properties of rootzones containing a black layer and some factors affecting sulphide production W.A. Adams and J.N.G. Smith.....	540
77. Comparing cultivars of three cool-season turfgrasses for nitrate uptake kinetics and nitrogen recovery in the field H. Liu, R.J. Hull, and D.T. Duff	546
78. Turf for horse racing: Turf nutrition by simultaneous analysis of soils, leaves, and roots H.Catrice, G. Grandchamp, M. Pierrang, P. Due, and F. Bondeux.....	553

79. Comparison of nitrate ion specific electrode, segmented flow analysis techniques for determining nitrate levels in putting green J.E. Chapman, S.E. Brauen, G.K. Stahnke, W.J. Johnston.....	560
80. Fall fertilization of zoysiagrass J.H. Dunn, D.D. Minner, B.F. Fresenburg and S.S. Bughrara.....	565
81. Evaluation of liquid nitrogen sources and the urease inhibitor (N-(<i>n</i> -butyl) thiophosphoric triamide on Kentucky bluegrass turf D.V. Waddington, P.J. Landschoot, J.M. Clerk, and M.A. Fidanza.....	572
82. Effects of late fall fertilization on turfgrass as influenced by application timing and N source D.J. Wehner and J.E. Haley.....	580

SECTION 5. STRESS PHYSIOLOGY

83. Irrigation water requirement of zoysiagrass R.H. White, M.C. Engelke, S.J. Morton, and B.A. Ruummele	587
84. Canopy temperature irrigation scheduling indices for turfgrasses in humid climates R.N. Carrow	594
85. Golf course water use characteristics in an arid zone based on facility type C.F. Mancino and L. Simmons.....	600
86. Drought resistance of diverse tall fescue cultivars R.H. White, A.H. Bruneau, and T.J. Cowett.....	607
87. Stomatal-row patterns among warm-season turfgrasses with a discussion of water conservation via stomatal anatomy R.L. Green, D.M. Casnoff, and J.B. Board.....	614
88. Comparative inter- and intra-specific leaf firing resistance to supraoptimal air and soil temperatures in cool-season turfgrass genotypes S.I. Sifers and J.B. Beard.....	621
89. Further trials of Evan's blue as a root hair vital stain: Characteristics of three turfgrasses under glasshouse and field conditions M.J. Oprisko and J.B. Beard.....	629
90. Varietal differences of some cool-season turfgrass species in relation to heat and flood stress K. Razmjoo, S. Kaneko, and T. Imada.....	636
91. Effect of clipping debris on Kentucky bluegrass canopy on temperature D.L. Martin and D.J. Wehner	643
92. Carbon monoxide absorption and release by C ₃ and C ₄ turfgrasses in light and dark R.J. Gladon, D.J. Brahm, and N.E. Christians	649
93. Response of St. Augustinegrass cultivars [<i>Stenotaphrum secundatum</i> (Walt.) Kuntze] to shade C.H. Peacock and AE. Dudeck.....	657
94. The effects of nitrogen deficiency on tissue NO ₃ , reduced N, soluble carbohydrates, and uptake of NO ₃ and NH ₄ by perennial ryegrass D.C. Bowman.....	664
95. Relative cold tolerance of bermudagrass cultivars A.H. Bruneau, C.H. Peacock, J.M. DiPaola, and R.H. White.....	673

96. Salinity effects on growth and nutrient uptake of selected warm-season turf A.E. Dudeck and C.H. Peacock	680
97. Traffic tolerance among cultivars of Kentucky bluegrass, tall fescue, and perennial ryegrass D.D. Minner, J.H. Dunn, S.S. Bughrara and B.S. Fresenburg	687

SECTION 6. PLANT GROWTH REGULATORS

98. Ethephon and ethylene effects on Kentucky bluegrass (<i>Poa pratensis</i> L.) morphogenesis K.L. Diesburg, and N.E. Christians	695
99. Impact of growth regulators on Kentucky bluegrass sod management and installation parameters J.R. Hall, III and S.W. Bingham	701
100. Pendimethalin influence on seedling Kentucky bluegrass developed from plant growth regulator -treated seed R.E. Schmidt and W. Luo	708
101. Late summer to early fall application of fertilizer and biostimulants on bermudagrass R.E. Schmidt and D.R. Chalmers	715
102. The influence of plant growth regulators on turf quality and nutrient efficiency J. Yan, R.E. Schmidt, and D.C. Martens	722

SECTION 7. BREEDING AND GENETICS

(see also Chapter 149, p. 1005H)

103. Assessment of turf colour change in <i>Lolium perenne</i> L. cultivars and Lines D. Thorogood, P.J. Bowling, and R.M. Jones	729
104. Selection of turf-type perennial ryegrasses (<i>Lolium perenne</i> L.) tolerant to paraquat D.T. Johnston and J.D. Patterson	736
105. Inheritance of growth habit in fountain grass M. Hockenberry Meyer and D.B. White	742
106. Sweet vernal (<i>Anthoxanthum odoratum</i> L) utilizing long-term research to benefit sustainable turfgrass development F.S. Rossi and C.R. Skogley	748
107. Turfgrass species and cultivars identification by RFLP analysis of chloroplast and nuclear DNA T. Ohmura, M. Yaneshita, S. Kaneko, Y. Ogihara, and T. Sasakuma	754
108. DNA fingerprinting of turfgrasses L.M. Cailahan, K.R. Weaver, G. Caetano-Anolies, B.J. Bassam, and P.M. Gresshoff	761
109. Fidelity of amplification fragment length polymorphisms (AFLP's) within multiple extractions from single seedlings of hard, chewings and red fescue P.M. Sweeney, T.K. Danneberger, and J.C. Kamalay	768
110. Heat resistance and rooting potential of Kentucky bluegrass cultivars V.G. Lehman and M.C. Engeike	775
111. Plant regeneration from protoplasts of Japanese lawngrass C. Inokuma, K. Sugiura, T. Cho, R. Okawara, S. Kaneko	780

112. Genetic characterization of zoysiagrasses by RFLP analysis of nuclear DNA M. Yaneshita, R. Nagasawa, S. Kaneko, Y. Oghara, T. Sasakuma.....	786
113. Evaluation of native New Zealand cotula (<i>Leptinella dioica</i> Hook. f.) lines for lawn bowling greens M.J. Hickey, T.R.O. Field, and W. Rumball	793
114. An overview of <i>Poa annua</i> L. reproductive biology P.G. Johnson, B.A. Ruumemele, P. Velguth, D.B. White, P.D. Ascher	798
115. Acid soil stress response of zoysiagrass R.R. Duncan, and L.M. Shuman	805
116. In vitro clonal propagation of three zoysia species S.L. Hu, M.O. Chai, D.C. Guo, Y.M. Niu, L.S. Dong	812
117. An overview of breeding and development of buffalograss for golf course turf T.P. Riordan, S.A. de Shazer, J.M. Johnson-Cicalease, and R.C. Shearman.....	816
118. Salt concentration effects on buffalograss germplasm seed germination and seedling establishment L. Wu and H. Lin.....	823
119. Bermudagrass, <i>Cynodon dactylon</i> (L) Pers., seed production and variety development A. Baltensperger, B. Dossey, L Taylor, and J. Klingenberg.....	829
120. Observations of population dynamics on selected annual bluegrass- creeping bentgrass golf-greens in MN V.W. Cline, D.B. White, H. Kaerwer	839
121. Turf development in Beijing, China W.F. Hunt, and Hou Wen	845

SECTION 8. ESTABLISHMENT AND MAINTENANCE

(see also Chapter 148, p. 1005A)

122. Effects of soil removal by post-harvest hydraulic washing on sod transplant rooting of a Kentucky bluegrass-perennial ryegrass polystand and a creeping bentgrass monostand B.G. Casimaty, J. Neylan, and J.B. Beard.....	850
123. Sod production In Florida in 1990 J.J. Haydu and J.L. Cisar	857
124. South Florida: A center of origin for turfgrass production P. Busey and R.W. White.....	863
125. Early establishment of zoysiagrass with seed under covers H.L. Portz, K.L. Diesburg, J.J. Murray, and M.J. Dozier	870
126. A newly developed zoysian-net planting system for quick establish- ment of zoysiagrass Y. Miyachi, F. Yano, H. Tonogi, and Y. Maki	877
127. An alternative seed treatment to overcome seed dormancy in zoysiagrass V. A. Kanikeberg and A.D. Brede	882
128. The renovation of soccer fields in Austria H.A. Richter	888

129. Lawnglass of China R. Li	896
130. Kentucky bluegrass seed and seedling performance as Influenced by matricconditioning W.J. Johnston, C.D. Burrows, J.D. Maguire, and G.K Stahnke	898
131. An evaluation of tall fescue and Kentucky bluegrass mixes V.A. Gibeault, S.T. Cockerham, R. Autio	905
132. Evaluating methods of establishment for warm-season turfgrasses B.A. Ruemmele, M.C. Engelke, S.J. Morton, and R.H. White	910

SECTION 9. INFORMATION EXCHANGE AND SYSTEMS

133. The development and management of turf research In Australia I.C. McIver	917
134. Standard nomenclature for turf technical information and automated information storage and retrieval D.S. Drane.....	920
135. The need for international educational opportunities for golf course superintendents D.M. Bishop, J.M. Schilling, R.D. Ochs, C.J. Robertson	925
136. Application of systems thinking to turfgrass management A.J. Turgeon	930
137. An assessment and diagnostic system for golf greens D.A. Barr	937
138. Research-based information transfer to turfgrass managers G. Landry and E. Brown.....	941
139. The New Zealand Turf Culture Institute - A model turf advisory service K.W. McAuliffe and R.J. Gibbs	946

SECTION 10. PESTICIDE AND NUTRIENT FATE

140. Nitrogen leaching losses of different N-sources and N-levels from golfgreens G. Hardt, B. Leinauer, H. Schulz.....	950
141. Soluble nitrogen and carbon in the underground of sports fields R. Hahndel and K. Isermann 957	
142. Washoff of Chlorothalonil from turf foliage R.L. Hill, E. Pfeil, and A.E. Herner	964
143. Mobility and persistence of pesticides in a USGA-type green. I. Putting green facility for monitoring pesticides J. Cisar and G.H. Snyder	971
144. Mobility and persistence of pesticides in a USGA-type green. II. Fenamiphos and Fonofos G.H. Snyder and J.L. Cisar	978
145. Subsurface placement of pesticides and other materials: Perspectives H.D. Niemczyk	984

146. Turf root-zone high-pressure injection measurement and imaging
R.B. Rogers, and A.J. Jobson 993

147. Items for environmentally responsible golf course management
R.W. White and C.H. Peacock 1000

148. Tall fescue/Kentucky bluegrass mixtures: effect of seeding rate, ratio,
and cultivar on establishment characteristics
A.D. Brede 1005A

149. National turfgrass evaluation program (NTEP): Progress and plans
K.N. Morris and J.J. Murray 1005H

REVIEWERS 1005

AUTHOR INDEX 1006

SUBJECT INDEX 1010
